Keep Seedlings Safe

Protect seedlings in flowerpots and garden beds from chilly overnight temperatures with a homemade cloche. Cut the base off a plastic 2-liter bottle and remove the cap, then place the bottle over the plant. Remove the cloche during warm, sunny days to prevent mildew growth.

5 Things About: Butterflies

- Butterflies can be found fluttering around every continent except Antarctica.
- The insects feed on nectar and pollen from flowers.
- They taste with their feet—that's where their taste receptors are located.
- A butterfly's two eyes have 6,000 lenses each.
- Their wings are actually transparent and covered with thousands of tiny scales. Light reflecting off the scales creates the colors and patterns we see.
