

Heartworm Awareness Month

Family Pet Clinic of Grapevine

April is Heartworm Awareness Month and we will be offering a special promotion from April 1st through April 30th which offers 15% savings on your pet's heartworm test and heartworm prevention! Your pet will need a current heartworm test to ensure they are heartworm negative, and at least 6 months of purchased heartworm prevention from our facility.

Heartworm Disease is spread through the bite of mosquitos. Just ONE bite can deliver up to 12 larvae to your pet. Heartworm disease can cause a multitude of ailments including coughing, lethargy, heart failure, respiratory distress, and even DEATH. Adult heartworms can grow up to 12 inches in length and dogs can harbor up to 250 adult heartworms at a time! Treatment of these adult worms is not only painful to your pet, but also to your wallet! Unfortunately, there is NO treatment for heartworm disease in cats which is why it is very important to have your cat on a year-round prevention, too! If you would like more information on Heartworm Disease and how to prevent it, a link will be provided below to the American Heartworm Society.

<https://www.heartwormsociety.org/pet-owner-resources/heartworm-basics>

Pets must have a current yearly exam with Family Pet Clinic of Grapevine. Pets must be current or have an updated heartworm test before prevention will be dispensed. To receive the 15% off, you must purchase at least 6 months of prevention. Heartworm tests and prevention must be done through our facility to receive your promotional discount. *Additional* rebates vary by heartworm prevention brands and can still be used in conjunction with this promotion. If you have ANY questions, please contact us at 817-488-4618 and a staff member will be more than happy to assist you.

Family Pet Clinic of Grapevine looks forward to seeing you and your pets!
