

Simparica Flea and Tick Prevention May Special

Family Pet Clinic of Grapevine

Flea and Tick prevention is an important part of you pet's healthcare. We will be offering a special promotion of 15% off Simparica from May 1st through May 31st! Your pet will need a current exam and purchase of at least 1 dose of Simparica from our facility. Additional rebates are also available at our clinic.

- Simparica is a great tasting chewable tablet given once a month. It safely delivers continuous protection against ticks and fleas from day 1 to day 35. That means you have some wiggle room if you give it to your dog a few days late.
- Simparica provides peak protection all month long with no decrease in effectiveness toward the end of the month like some other brands.
- Tick-borne diseases represent a widespread and growing public health hazard to dogs (and their human companions), causing debilitating illness and even death. It only takes one tick to spread disease, so continuous protection is critical to help reduce the risk of infection.
- Likewise, it only takes a single "pregnant" flea to start an infestation on a dog or in a home. And although fleas are largely perceived as a mere nuisance, they too, can pose health risks to pets and humans.

Pets must have a current yearly exam with Family Pet Clinic of Grapevine to receive the 15% off. *Additional* rebates available and can still be used in conjunction with this promotion. If you have ANY questions, please contact us at 817-488-4618 and a staff member will be more than happy to assist you.

Family Pet Clinic of Grapevine looks forward to seeing you and your pets!
